AB JP 03259941 A UPAB: 19931006

A polypropylene type resin compsn. consisting of 30-60 wt.% of (a) polypropylene type resin, 20-55 wt.% of (b) polyphenylene ether resin, 2-5 wt.% of (c) block copolymer of formula, A-(B-A)<sub>n</sub> (A = styrene polymer block; B = at least a kind of polymer block selected from isoprene polymer block, hydrogenated butadiene polymer block and hydrogenated isoprene polymer block; n = integer at least 1) or (A-B)<sub>n</sub> (A,B,n = the same as above) and 8-30 wt.% of particle like rubbery polymer with mean particle size 0.08-2 microns.

Pref. polyphenylene ether resin is mixt. of polyphenylene ether with polystyrene type resin or graft polymer of polyphenylene ether with polystyrene type resin. Pref. block copolymer (c) contains 20-80 wt.% of component A.

USE/ADVANTAGE - Used for parts of cars, appliances, office automation apparatus, etc., because it has good moulding property for large scale moulding and thin wall moulding as well as well balanced solvent resistance, heat resistance, rigidity, impart strength and appearance.
